UPCC
Use Case Specification

Submitted to:

Asst. Prof. Ma. Rowena C. Solamo
Faculty Member
Department of Computer Science
College of Engineering
University of the Philippines, Diliman

Submitted by:
Abaja, James Gabriel
Cruz, Rayven Ely
Lim, Ciana

In partial fulfillment of academic requirements
for the course
CS 191 Software Engineering I
of the
1st Semester, AY 2017-2018

Unique Reference:

The documents are stored in the https://github.com/limciana/UPCC.

1.2.3 - Delete Subject: https://bit.ly/UPCCUseCaseSpecs1_2_3

Document Purpose:

This document's purpose is to give the possible scenarios, the description of each scenario, and what the user and developer could expect, when one will add a curriculum to UPCC.

Target Audience:

The target audience of this document are the developers who are interested in continuing and extending the project, users who are interested in how the system works, and the professor handling the course.

Revision Control

History Revision:

Revision Date	Person Responsible	Version Number	Modification
10/10/17	James Abaja	1.0	Initial Document.

*Use-Case Name*:   Edit Subject

Description: This use-case deletes a subject in the curriculum specified. This use-case is authorized for the use of administrators only. This use-case is also restricted to subjects already existing inside the curriculum specified.

Preconditions: The actor must be an administrator for this use case.

Flow of Events:

Scenario Name	Description
Scenario 1 (Basic Flow) The administrator confirms the deletion of the subject.	1. The administrator opens the 'delete subject' module. 2. The administrator selects the subject to be deleted. 3. The system will ask the admin if he confirms the removal of the subject. 4. If the administrator confirms, the system will permanently delete the subject. 5. The system will display a confirmation message of the deletion.
Scenario 2 The administrator declines to confirm the deletion of the subject.	1. The administrator opens the 'delete subject' module. 2. The administrator selects the subject to be deleted. 3. The system will ask the admin if he confirms the removal of the subject. 4. If the administrator declines, the system will not delete the subject. The module closes.
Scenario 3 The actor exits the 'delete subject' module.	1. The administrator opens the 'delete subject' module. 2. The administrator selects the subject to be deleted. 3. The administrator closes the module.

Activity Diagram of the Flow of Events:

Postcondition: A subject is either successfully deleted in the curriculum or no changes will be seen.

Relationships: This use case is extends use case '1.2 Update Curriculum'

Special Requirements:

The curriculum to be updated must exist.
The subjects must be part of the BS Computer Science program.
Only the administrator has access to these functionalities.
